## ***Business Insurance* Ranks GENEX Services, Inc. First in Case Management**

**WAYNE, Pa. – Mar. 22, 2011** -- GENEX Services, Inc. ("GENEX") has been named the nation's leading case management services provider by *Business Insurance* magazine in its annual ranking published on March 21.

GENEX managed over 370,000 cases in 2010. "We are very pleased to be recognized as an industry leader in case management by *Business Insurance*," said Peter Madeja, CEO of GENEX. "In 2010, we announced the acquisition of Intracorp. We believe that the addition of resources and knowledge from these two companies will extend our leadership position as an organization with scale, unequalled geographic coverage, workforce experience, a broad suite of managed care services and the ability to exceed customer expectations."

The organization's case managers, most of whom are registered nurses and vocational rehabilitation specialists, work with treating physicians to coordinate appropriate, quality care, ensure patient satisfaction, improve medical outcomes, facilitate a patient's timely return to work, and decrease overall health care expenses.

For this ranking, *Business Insurance* defines case management as coordinating and monitoring treatment for catastrophic, complex or prolonged illnesses and injuries—including discharge planning, onsite or telephone case review and/or patient referrals—as well as managing communication among patients, providers and payers throughout the course of a claim.

*Business Insurance is an industry publication that reports on corporate risk, employee benefits and managed health care issues. The annual case management survey profiles companies that deliver case management services for group health and workers' compensation programs directly to corporate or institutional employers. The ranking is based on 2008 gross revenues generated by case management services.*

GENEX ([www.genexservices.com](http://www.genexservices.com)) provides insurers, employers and Third Party Administrators with a broad array of managed care solutions and information management capabilities through its 2,700 employees and more than 60 service locations throughout North America. The company has a demonstrated ability to help clients manage and control the medical, wage loss, and productivity costs associated with claims in the workers' compensation, disability, automobile, and health care systems. GENEX services include utilization management, case management, medical bill review, preferred provider organizations, specialty networks, Social Security representation, information management, Medicare Set-Aside and related capabilities.
