

[Workers' Comp](#)

The 411 on Tapering with a CA Formulary Progress Analysis [Recording]

Event Details

When: Where: [Register Now](#)

For years, there has been significant focus on reducing opioid and other painkiller distribution in both acute and chronic pain patients. In this session, PRIUM's Mark Pew will explain when and how opioids and other drugs should be used, the impact of mixing alcohol, complications and alternative treatments, and the tapering process for your clients.

The presenter will also explore how workers' comp has responded to California's new regulatory framework thus far, detail the rules that apply to the drug list designations, assess how the formulary relates to the latest Medical Treatment Utilization Schedule updates, and highlight tapering standards of care during the transition period.
