## Process in place to keep services in place during massive power outage

**WAYNE, PA** – Feb. 18, 2021 – As millions of Texans cope with significant power outages throughout the state, Genex Services, a leader in medical cost-containment and disability management services, has initiated its disaster preparedness plan to ensure coverage for the injured workers and customers we serve.

Through our case management platform, Unity, Genex is well equipped to handle unexpected situations at a moment's notice, providing the right case manager at the right time. Our emergency case management plan is as follows:

**Case management:** Regional case managers will manage cases telephonically until normal field operations are feasible. Our case managers across the country are also ready to assist as necessary. This remote case manager will manage the file telephonically and will continue to update all parties.

**Referrals:** Referrals will be handled through Genex's Central Processing Department, with a remote professional handling the referrals. If the referral is a catastrophic or emergency case, case managers will be available telephonically until it's feasible for a local field case manager to assume management of the file.

Should situations change over the next few days, Genex will continue to provide updates as they develop. In the meantime, we encourage all those in the affected areas to follow their regional disaster plans and stay safe.
